

QObject

Okular::DocumentObserver

Observer

```
graph BT; Observer --> QObject; Observer --> Okular::DocumentObserver;
```

The diagram illustrates a class hierarchy where the 'Observer' class is a base class for both 'QObject' and 'Okular::DocumentObserver'. A horizontal line connects the two top-level boxes, with a vertical line descending from its center to the 'Observer' box below. Arrows point from the 'Observer' box up to each of the two top-level boxes, indicating inheritance.
