

QObject

SimplePageSize

pageSize

```
graph BT; QObject --|> SimplePageSize; pageSize --|> QObject; pageSize --|> SimplePageSize;
```

The diagram illustrates a class hierarchy. At the top, two boxes labeled 'QObject' and 'SimplePageSize' are connected by a horizontal line with upward-pointing arrows at both ends, indicating inheritance. Below this line, centered, is a box labeled 'pageSize'. A vertical line descends from the center of the horizontal line to the 'pageSize' box, and two diagonal lines branch out from this point to the bottom of the 'QObject' and 'SimplePageSize' boxes, indicating that 'pageSize' is a base class for both.
